[linkedin.com/in/peterramos2](https://www.linkedin.com/in/peterramos2)

Senior full-stack engineer with 7+ years of experience building product-facing features at scale with modern web technologies. 5+ years delivering in a remote, distributed engineering organization at Recharge—the Shopify subscription platform behind \$42B GMV, 20,000 brands, and 100M subscribers. Daily practitioner of agentic engineering workflows using Claude Code with MCP integrations: spec-driven, context-aware, focused on clean, maintainable output. Shipped features end-to-end from product conception to production.

TECHNICAL SKILLS

React, Remix, Vue, TypeScript, ES6, Node.js, Express, Python, Flask, HTML5, CSS3, Claude, Cursor, MCP, coding agents, Vercel, Docker, GraphQL, MongoDB, MySQL, PostgreSQL, Snowflake, Splunk, Sentry, New Relic, Git.

EXPERIENCE

Senior Frontend Software Engineer, Recharge - Remote May 2023 - Aug 2026

- Led frontend development of dashboards and custom drill-down reports in the merchant analytics platform, collaborating closely with design and product teams to surface business metrics to 20,000+ merchants. Worked across the stack with backend and data teams on the custom reporting pipeline.
- Expanded the SMS concierge feature into the UK, building the signup form in React/TypeScript and implementing the Python/Flask backend flow: submitting merchant details to Twilio for regulatory approval and extending a status webhook to handle different states with user notification.

Senior Full-Stack Software Engineer, Stay.AI - Remote Nov 2022 - May 2023

- Led architecture and development of the customer portal rebuild, the primary merchant-facing surface, on a React/Node stack with Redis, PostgreSQL, and Twilio.

Frontend Software Engineer, Recharge - Remote Feb 2021 - Oct 2022

- Develop and maintain e-commerce subscription management software using Vue, TypeScript, Nuxt, Vuetify, Cypress, Jinja, Flask, SQL, and more.

Software Developer, Covetrus - Portland, ME / Remote Apr 2019 - Feb 2021

- Frontend for a digital prescription platform serving 100,000+ veterinary customers. React, TypeScript, GraphQL, Node; light backend in Java/Spring Boot on a Kafka event-driven architecture.

PROJECTS

Stock Signal Engine — Rule-based intraday trading signal engine with a Next.js/React/TypeScript dashboard reading from a Flask JSON API; an LLM generates the signal rationale but never the trading decision.

Airbnb Listing Analyzer — Next.js/React/TypeScript web app + Chrome extension evaluating Airbnb listings against user-defined criteria. Extension intercepts Airbnb's live GraphQL API calls to pull review data; a web app built with TanStack Query and Prisma, calls Claude for evaluation with results stored as structured data.

EDUCATION

2012 B.Sc Jazz Studies, SUNY New Paltz
